EDUCATION

Virginia Commonwealth University (VCU)

Richmond, VA

B.S. Information Systems | GPA: 3.8 | August 2026

PROFESSIONAL SUMMARY

Business Analyst with early-career experience in financial services and data-driven performance improvement. Skilled in SQL, Tableau, Power BI, and financial modeling, delivering dashboards and AI-powered reporting used by 60+ stakeholders. Led development of automated reporting solutions and KPI monitoring that enhanced visibility and supported strategic initiatives. Aiming to leverage analytical expertise to drive data-informed decisions and operational excellence.

EXPERIENCE

Business Analyst Intern | KAAS Solutions | Chantilly, VA

Sep 2025 - Present

- Analyze business requirements, AI model outputs, and performance metrics using Python and SQL to identify improvement opportunities, then translate quantitative findings into actionable recommendations that enable stakeholders to prioritize initiatives.
- Develop Power BI dashboards, AI-enabled automation workflows, and automated reporting solutions for 60+ stakeholders, improving visibility into key business metrics and enabling data-based business decisions.
- Conduct AI model testing, KPI monitoring, trend analysis, and data validation using Python and SQL to assess program efficacy, uncover key performance drivers, and inform strategic initiatives.

Program Management Intern | Navy Federal Credit Union - MarTech | Vienna, VA

May 2025 - Aug 2025

- Partnered with cross-functional stakeholders in Marketing, Technology, and Operations to gather requirements, enabling clearer project scope and faster approval of strategic initiatives.
- Analyzed workflows and operational performance to pinpoint pain points and bottlenecks, informing process redesign that improved overall efficiency.
- Built reporting solutions and dashboards tracking 120+ operational metrics, strengthening performance monitoring and supporting data-driven recommendations and leadership decision-making.

Business Analyst Intern | Chainbridge Solutions | Richmond, VA

May 2023 - Aug 2023

- Analyzed business and operational data with SQL, Tableau, and Excel, uncovering performance trends and key business drivers that informed strategic decisions and helped leadership prioritize initiatives.
- Synthesized analytical findings and stakeholder requirements using SQL and Tableau into clear, actionable recommendations, which were adopted to refine business strategy and launch process-improvement initiatives.
- Performed KPI monitoring, data validation, and trend analysis with business performance metrics, identifying performance opportunities that guided cross-functional initiatives and drove measurable process improvements.

PROJECTS

AI-Powered Ticket Automation System | Independent Study

May 2026 - Sep 2026

- Designed and developed an AI-powered automation system in n8n to automate data intake, classification, prioritization, routing, workflow management, and performance tracking.
- Built and integrated an AI agent and conversational chatbot using large language models to analyze unstructured data, interpret user requests, and support automated decision-making.
- Developed and tested analytical workflow logic across datasets of up to 2,000 records, transforming inconsistent source data into standardized outputs while identifying routing, data-quality, and processing issues.
